Peter Brooke has been called "the Johnny Appleseed of venture capital" for his role in the industry's spectacular growth--from a small base in the Northeastern United States in the 1960s, to today's highly visible role in economies all over the world. The key to Brooke's success--and his lasting legacy--is his vision for the industry as an essential element of economic growth and development. At a time when some believe that venture capital's best days are behind it,

and private equity has come under harsh criticism in the United States and elsewhere, A Vision for Venture Capital offers a fresh look at why the industry exists and how it can fulfill its potential in the twenty-first century.

Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo,

impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. Jeffrey Bussgang is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups—one went public, the other was acquired. Now he draws on his experience and unique perspective on the "other side" as a venture

capitalist helping entrepreneurs bring their dreams to fruition. Bussgang offers detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, Mastering the VC Game will prove invaluable for entrepreneurs seeking capital and successful partnerships.

Venture capitalists are the handmaidens of innovation. Operating in the background, they provide the fuel needed to get fledgling companies off the ground--and the advice and guidance that helps growing companies survive their adolescence. In *Creative Capital*, Spencer Ante tells the compelling story of the enigmatic and quirky man--Georges Doriot--who created the venture capital industry. The author traces the pivotal events in Doriot's life, including his experience as a decorated brigadier general during World War II; as a maverick professor

at Harvard Business School; and as the architect and founder of the first venture capital firm, American Research and Development. It artfully chronicles Doriot's business philosophy and his stewardship in startups, such as the important role he played in the formation of Digital Equipment Corporation and many other new companies that later grew to be influential and successful. An award-winning Business Week journalist, Ante gives us a rare look at a man who overturned conventional wisdom by proving that there is big money to be made by investing in small and risky businesses. This

vivid portrait of Georges Doriot reveals the rewards that come from relentlessly pursuing what-if possibilities--and offers valuable lessons for business managers and investors alike.

Entrepreneurs drive the future, and the last several decades have been a thrilling ride of astounding, far-reaching innovation. Behind this transformative progress are also the venture capitalists - who are at once the investors, coaches and allies of the entrepreneurs. William H. Draper III knows this story first-hand, because as a venture

capitalist, he helped write it. For more than 40 years, Bill Draper has worked with top entrepreneurs in fabled Silicon Valley, where today's vision is made into tomorrow's reality. The Startup Game is the first up-close look at how the relationship between venture capitalists and entrepreneurs is critical to enhancing the success of any economy. From a venture capitalist who saw the potential of Skype, Apollo Computer, Hotmail, OpenTable, and many other companies, come firsthand stories of success. In these pages, Draper explores how to evaluate innovative ideas and the entrepreneurs behind

those ideas, and he shares lessons from Yahoo, Zappos, Baidu, Tesla Motors, Activision, Measurex, and more. Also, in revealing his on-the-ground account of how Deng Xiaoping brought China roaring into the modern world and how Manmohan Singh unlocked the creative genius of Indian entrepreneurs, Draper stresses the essential value of farsighted political leadership in creating opportunity. The author also discusses his efforts to bring best practices of the venture capitalist/entrepreneur partnership to the social sector. Written in an engaging narrative, and incorporating many of the

author's personal experiences, this book provides a much-needed look at how the world of venture capital and entrepreneurship works.

"Are we witnessing traditional capital sources being disrupted? Dudley interviews nine founders from business, consumer and real estate lending platforms and other key industry influencers. These relatively nascent platforms have scaled to originate hundreds of millions and in some cases billions in loans. Learn about the inspiration of the founders and their path

toward identifying their market fit. The stories are informative for those seeking to learn more about marketplace and alternative lending or those who find the entrepreneurial journey inspirational."

Venture Capital is a marriage between 'people with money and no ideas' and 'people with ideas and no money'. It is a high-risk investment vehicle with the potential for manifold returns and the possibility of a complete investment written-off. Although it

is essentially private money and smaller in size than traditional financing pillars, its impact has been phenomenal, even to the extent of transforming the way we live in the modern world. Yet the fact remains that the business of venture capital is not fully understood by startup founders and fund managers are also not familiar with the inner workings of other venture funds. And, as more public or tax-players' money flows into this asset class, it begs a shift from the existing esoteric styles to more transparent and predictable operations. It would also be beneficial if the craft of venture capital is

well understood by the business community and most importantly, policymakers as Demystifying Venture Capital: How it works and How to get primarily written to address these concerns, and to explain the subject in a nontechnical manner, as far as possible. A handbook for fund managers, startups, academicians interested in the subject, policy makers, and aspiring entrepreneurs, this book is unique as it has been written along with the top 25 venture funds in India as co-authors. The first part builds the concepts and theoretical framework of venture investing throughout the venture capital life

cycle, giving readers a robust academic backdrop while the second part offer 25 first-hand accounts of how VCs invest, where they invest, what they look for while investing, providing invaluable insights into the minds and methods of VCs. All in all, this prototype is a first-of-its-kind endeavour to deliver a 360-degree + view of the Venture Capital universe.

entrepreneurs how to market their companies to investors How can businesses do a better job of attracting capital? The answer:

"Marketing!" Marketing expert Philip Kotler teams up with a renowned marketing consultant and an INSEAD professor for this practical, marketing-based approach to raising capital from investors. Based on the premise that entrepreneurs and business owners often don't understand what investors want and how they make their decisions, *Attracting Investors* offers a larger view of the factors involved, and guides both startup and veteran firms ineffectively raising capital.
