14. Chapter 14: Cardiovascular System. Figure xx.1 This artist ' s conception of the human heart suggests a powerful engine—not inappropriate for a muscular pump that keeps the body continually supplied with blood. (credit: Patrick J. Lynch) The human body needs blood to deliver nutrients to and remove wastes from our trillions of cells.

Chapter 14: Cardiovascular System – Human Biology

Chapter 14 - The Human Genome The Human Genome Project (HGP) formally began in 1990 and was finished in 2003. The goal was to discover the DNA sequences for all of the 20,000-22,000 genes that are found in human beings. This knowledge is vital for research into genetic disorders and possible genetic solutions to these disorders.
