What's the worst thing you can hear when you have a good idea at work? "That's not how we do it here!" In their iconic bestseller *Our Iceberg Is Melting*, John Kotter and Holger Rathgeber used a simple fable about penguins to explain the process of leading people through major changes. Now, ten years later, they're back with another must-read story that will help any team or organization cope with their biggest challenges and turn them into exciting opportunities. Once upon a time a clan of meerkats lived in the Kalahari, a region in southern Africa. After years of steady growth, a drought has sharply reduced the clan's resources, and deadly vulture attacks have increased. As things keep getting worse, the harmony of the clan

is shattered. The executive team quarrels about possible solutions, and suggestions from frontline workers face a soul-crushing response: “That’s not how we do it here!” So Nadia, a bright and adventurous meerkat, hits the road in search of new ideas to help her troubled clan. She discovers a much smaller group that operates very differently, with much more teamwork and agility. These meerkats have developed innovative solutions to find food and evade the vultures. But not everything in this small clan is as perfect as it seems at first. Can Nadia figure out how to combine the best of both worlds—a large, disciplined, well-managed clan and a small, informal, inspiring clan—before it’s too late? This book distills Kotter’s decades of experience and award-winning research to reveal why organizations rise and fall, and how they can rise again in the face of adversity.

#1 New York Times Bestseller “THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In *Think Again*, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I’ve never felt so hopeful about what I don’t know.” —Brené Brown, Ph.D., #1 New York Times bestselling author of *Dare to Lead* The bestselling author of *Give and Take* and *Originals* examines the critical art of rethinking: learning to question your opinions and open other people’s minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there’s another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the

discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. *Think Again* reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

story about the redeeming potential of mercy. Bryan Stevenson was a gifted young attorney when he founded the Equal Justice Initiative, a legal practice dedicated to defending the poor, the wrongly condemned, and those trapped in the furthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man sentenced to die for a notorious murder he didn't commit. The case drew Stevenson into a tangle of conspiracy, political machination, and legal brinkmanship - and transformed his understanding of mercy and justice forever."--Back cover.

The secret to giving better feedback isn't what we say – it's what others hear. Too often, people hear about a past they can't control, not a future they can. That changes with “feedforward” – a radical approach to sharing feedback that unleashes the performance and potential of everyone around us. From managers and coaches trying to energize their teams, to teachers hoping to motivate their students, to parents looking to empower their children, people from all walks of life want others to hear what they have to say. Through a lively blend of stories and studies, *The Feedback Fix* shows them how by presenting a six-part REPAIR plan that spreads feedforward across boardrooms, classrooms, and even dining rooms. Even with drastic changes in how we work and live, the experiences we create for others – joy or fear, growth or decline, success or failure – still hang on the feedback we share. *The Feedback Fix* makes a compelling argument for getting what we want by giving others what they need – all while rebuilding the way we lead, learn, and live.
